

NO. 18
30 October 1964

UNITED COMMUNITY SERVICE DRIVE

I know that your attention, like my own, has been somewhat distracted by the political issues and campaign techniques that we are currently faced with, which brings me to a point. Our campaign to raise \$10,739 dollars for the UCS drive has run into some problems, specifically we just haven't quite made our goal. I am told that we are about \$400.00 short, so lets look up our Keymen today and put this campaign into the Center's file of success stories. We have the other type file - you know - the one we don't want to be reminded of, much less look at or use - so see your Keyman today.

MINUTEMAN FLAG

Its official now, we are to be presented the coveted and anxiously awaited Minuteman Flag on Tuesday, 24 November 1964, at a ceremony to be staged near our flag pole. The details of the ceremony will be announced later. For the present time it is understood that the District Commandant and Treasury Department Officials will participate in presenting the flag to the Center. I extend my personal congratulations and thanks to all those personnel who made the extra effort to get our participation to the required percentage and to its present high level. I am most pleased with this attainment and urge all hands to continue to support this very worthwhile program. It is good and proper that this award be emblazoned on the escutcheon of the Public Works Center.

COMMENDATIONS

We have received letters and comments on the outstanding work and the manner in which it is being performed by the Public Works Center, as follows:

1. The First Lieutenant at Fleet Anti-Air Warfare Training Center (FAAWTC), CWO Ramet, expressed his gratitude for the expeditious and fine job that Mr. Corbitt and Mr. Redfield (Service Division personnel) did on the installation of a movie screen at that activity.

2. Approximately 100 hours were saved in painting Naval Electronics Laboratory Buildings T304 and T305, and at the same time the workmanship was excellent. As you know, NEL is very demanding of our Center because of the pressing nature of their various missions. It is this proficient workmanship displayed by Mr. Jesse Davy, Leadingman Painter, and his crew that encourages NEL to do more work with the Public Works Center.
